FRAUD IN 2020**

KEY AREAS OF RISK:

CYBERSECURITY

Over 67% of U.S. healthcare breaches were caused by hacking and IT incidents. It is estimated that about 26 million patient records were exposed to unauthorized parties in the US in 2020, with about 24.1 million of those as the result of healthcare cyber attacks.

FRAUD PREVENTION / FINANCIAL CONTROLS

Organizations lose an estimated 5% of revenue to fraud each year. A significant contributor of fraud is attributed to a lack of internal controls.

EMERGENCY PREPAREDNESS

100% of entities needed to execute an emergency preparedness plan in 2020. Many plans fell short.

HOW HAVEN DEFENDS

CYBERSECURITY

Protect your organization's sensitive data and credentials with our comprehensive assessment of your internal and/or external network security conventions.
